

Agreement between Concordia University's Capstone Project with Munera Intelligence (the "Company") with respect to the Intellectual Property, License & Liability, Code Access, Confidentiality & Return

1. Copyright

All software, code, documentation, inventions, and other work products created by the student(s) during the internship (the "Work Product") shall be the sole and exclusive property of Munera Intelligence. The student(s) hereby irrevocably assign to Munera Intelligence all rights, title, and interest in and to the Work Product, including all intellectual property rights therein, without any additional consideration beyond the internship arrangement.

2. License & Liability

"THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT. IN NO EVENT SHALL THE AUTHORS OR COPYRIGHT HOLDERS BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF OR IN CONNECTION WITH THE SOFTWARE OR THE USE OR OTHER DEALINGS IN THE SOFTWARE."

3. Code Access, Confidentiality & Return

01. **Definitions.** "Code" means all source code, object code, scripts, models, prompts, documentation, binaries, APIs, configurations, and related materials disclosed by the Company. "Capstone Project" means the project expressly approved in writing by the Company.
02. **Limited, Revocable License.** Subject to strict compliance with this clause, the Company grants Students a limited, non-exclusive, non-transferable, non-sublicensable, revocable license to access and use the Code solely to the minimum extent necessary to execute the Capstone Project.
03. **Term of Access.** Access automatically terminates on the earlier of: (a) May 31, 2027, or (b) twelve (12) months following completion of the Capstone Project. The Company may suspend or revoke access immediately at any time for convenience or breach.
04. **Scope & Storage.** Students must access/store Code only within Company-approved repositories, accounts, and devices; no local, personal, cloud, or external storage (e.g., GitHub personal accounts, Google Drive, Dropbox) is permitted.
05. **Prohibited Acts.** Students shall not, except if authorized by the Company, directly or indirectly:
 - a. use the Code for any purpose other than the Capstone Project;
 - b. retain any Code or Work Product after the end of the authorized period;

- c. modify, adapt, translate, merge, or create derivative works of the Code after the earlier of internship end or Project completion;
- d. copy, disclose, publish, post, upload, fork, or distribute the Code (or any portion, screenshots, snippets, hashes, or architectural details) to any third party;
- e. use the Code for personal, commercial or competitive purposes;
- f. reverse engineer, decompile, disassemble, benchmark, or test for vulnerabilities (including scanning, scraping, or data-mining);
- g. train, fine-tune, or otherwise input the Code or any portion thereof into AI/ML systems, LLMs, or analytics tools (including code assistants) that could retain or learn from it;
- h. combine the Code with, or incorporate it into, open-source or third-party software in a way that imposes disclosure, copyleft, or licensing obligations;
- i. remove or alter proprietary notices, watermarks, or access controls;
- j. share credentials, permit account sharing, or circumvent technical restrictions.

06. Confidentiality. The Code is Confidential Information. Students must protect it with no less than industry-standard safeguards, disclose it only to teammates and faculty expressly authorized in writing by the Company and bound by confidentiality obligations, and use it only as permitted herein.

07. Security & Audit. Students must:

- a) use multi-factor authentication and strong passwords;
- b) refrain from disabling logs or telemetry;
- c) promptly report suspected compromise or unauthorized access; and
- d) on reasonable notice, cooperate with audits limited to verifying compliance (including producing confirmation of authorized storage locations and access logs).

08. Return/Destruction & Certification. Upon any termination or Company request, Students must immediately cease use, return all tangible materials, and permanently delete/irreversibly destroy all copies, fragments, and derivatives of the Code (including from backups and caches), and provide a written deletion certificate within five (5) days.

09. Injunctive Relief & Remedies. Any breach of this Agreement by the student(s) may cause irreparable harm to the Company. Subject to the indemnification obligations imposed in favor of the University, nothing in this Agreement shall be interpreted as limiting or restricting the Company's rights and remedies directly against the student(s) in the event of breach, gross fault (*faute lourde*), fraud, theft, willful misconduct, or any unlawful act, in accordance with article 1474 of the Civil Code of Québec. In such circumstances, the Company shall be entitled to injunctive relief (without bond), specific performance, recovery of damages (including consequential damages to the extent permitted by law), disgorgement of any gains, recovery of attorneys' fees and costs, and any other remedies available at law or in equity.

10. Survival. Sections 5–10 survive termination or expiry of access.
