

Quebec Construction Sector: A Prioritized Analysis of Municipal Growth Markets for 2025

Executive Summary: Quebec's Premier Construction Growth Markets for 2025

This report provides a detailed analysis and strategic prioritization of municipal construction markets across Quebec for the 2025 fiscal and calendar year. The findings are based on a comprehensive synthesis of provincial economic forecasts, sectoral growth data from the Commission de la construction du Québec (CCQ), and an in-depth review of municipal-level financial statements, capital expenditure plans, and urban development indicators. The primary objective is to equip business development and data acquisition teams with actionable intelligence to target high-potential regions for lead generation.

Key Findings at a Glance

The Quebec construction industry is on track for a record-breaking year in 2025, with total activity projected to reach an unprecedented 211.5 million hours worked.¹ This robust top-line growth, however, conceals a significant reallocation of capital and activity across sectors.

Key market dynamics include:

- **Uneven Sectoral Growth:** The industry's expansion is not uniform. The **Industrial** sector is experiencing a significant boom, with projected growth of 14% to 24%, driven by massive investments in the battery supply chain. The **Residential** sector is poised for a strong recovery with 7% growth, fueled by easing interest rates and high demand. Conversely, the **Institutional and Commercial** sector, traditionally the largest by volume, is expected to contract by 2% due to a slowdown in public investment.³

- **Regional Concentration of Growth:** The highest percentage growth is geographically concentrated in administrative regions attracting major industrial projects. The **Mauricie–Bois-Francs** region, in particular, has emerged as a primary hotspot due to its central role in the province's burgeoning battery sector.³
- **Metropolitan Dominance in Volume:** Major metropolitan areas, including **Montreal**, **Longueuil**, and **Laval**, continue to represent the largest markets in terms of absolute investment volume. This is sustained by massive, multi-year public infrastructure programs and persistent, high-volume residential demand.⁴

Prioritized Municipal Ranking

Based on this analysis, the following municipalities are prioritized and categorized according to their specific market characteristics:

- **Premier Growth Markets:** Municipalities demonstrating both high percentage growth and significant new investment.
 - **Trois-Rivières** and **Shawinigan** are leading this category, capitalizing on the industrial boom in the Mauricie region, which is creating a powerful secondary wave of residential and infrastructure construction.
 - **Sherbrooke** stands out for its exceptional demographic growth, driving a robust residential market backed by substantial municipal investment in infrastructure.
- **Major Volume Markets:** Large urban centers with massive, sustained construction spending.
 - **Montreal**, **Longueuil**, **Laval**, and **Gatineau** remain indispensable targets due to the sheer scale of their budgets, capital expenditure plans, and ongoing densification projects.¹²⁰

Core Strategic Recommendation

To effectively capitalize on the 2025 Quebec construction landscape, lead generation efforts must adopt a bifurcated approach. A **high-growth strategy** should target the industrial supply chain and subsequent residential development boom occurring in the Mauricie region (Trois-Rivières, Shawinigan). Concurrently, a **high-volume strategy** should focus on the large-scale, multi-year infrastructure and high-density housing projects concentrated in the Greater Montreal Area and Gatineau. This dual focus will ensure alignment with both the emerging and established flows of capital within the province's construction sector.

The 2025 Quebec Construction Landscape: A Sectoral and Economic Analysis

To understand the opportunities at the municipal level, it is essential to first establish the provincial macroeconomic and industry-specific context. The construction sector in 2025 is shaped by a confluence of favorable economic policies, massive public investment programs, and specific sectoral shifts that are redefining the nature of growth across Quebec.

Provincial Economic Drivers & Headwinds

Several key factors are creating a fertile ground for construction activity, while some persistent challenges require strategic navigation.

Monetary Policy Impact

Throughout 2024, the Bank of Canada implemented a series of interest rate cuts in response to easing inflation, reducing its overnight rate significantly.⁶ This loosening of monetary policy is a primary catalyst for the forecasted recovery in the construction sector. Lower borrowing costs are beginning to stimulate investment, with a particularly noticeable impact on multi-residential developments and the house-enabling infrastructure projects required to support them.⁶ This economic stimulus is crucial for the projected rebound in the residential market after a period of stagnation caused by higher rates.⁸

Provincial Investment Programs

The Government of Quebec and its federal partners have committed to historic levels of infrastructure spending, creating a long-term pipeline of high-value projects.

- **Plan québécois des infrastructures (PQI) 2025-2035:** This foundational provincial plan has been augmented by \$11 billion, bringing its total value to **\$164 billion** over the

next decade. These funds are earmarked for the maintenance and enhancement of critical public infrastructure in the health, education, and transportation sectors, guaranteeing a stable source of large-scale projects for years to come.¹⁰

- **Hydro-Québec's Action Plan 2035:** A monumental driver for the civil engineering and roads sector, this plan outlines capital investments ranging from **\$135 billion to \$160 billion** between 2024 and 2035.¹⁰ While the immediate forecast for the civil engineering sector shows a slight pullback in 2025 after a record year, this plan ensures accelerated growth in the subsequent years, underpinning long-term demand for heavy construction services.²
- **Canada Community-Building Fund (CCBF):** Through a renewed federal-provincial agreement, Quebec municipalities will receive over **\$2.8 billion** in funding over the next five years. This includes \$535 million for the 2024-2025 fiscal year alone, empowering local governments to address their specific infrastructure priorities and creating a decentralized stream of smaller to mid-sized construction opportunities.¹²

Economic Challenges

Despite the positive outlook, the industry faces several headwinds. The threat of U.S. tariffs on key construction materials such as steel, aluminum, and lumber remains a significant concern, with the potential to increase project costs and introduce market uncertainty.¹ Furthermore, Quebec's construction industry continues to grapple with persistent labor shortages and productivity challenges that are reportedly more acute than in neighboring Ontario, potentially leading to project delays and increased costs.¹⁶

Sectoral Performance Deep Dive

The overall health of Quebec's construction industry in 2025 is the result of powerful but divergent trends across its four main sectors. A detailed analysis of data from the Commission de la construction du Québec (CCQ) reveals a significant rotation of investment and activity, which is a critical factor for strategic planning.

Industrial Sector (Projected Growth: +14%)

The industrial sector is the unambiguous growth leader in 2025. The CCQ forecasts a surge in activity from 14.5 million hours worked in 2024 to **16.5 million hours in 2025**, representing a 14% increase.³ This comes on the heels of an already explosive 24% expansion in 2024 over 2023.³ This growth is almost entirely propelled by the development of the electric vehicle battery supply chain ("filière de batteries"), with major projects concentrated in specific regions like Mauricie-Bois-Francs.¹ This makes municipalities that are successfully attracting these high-tech manufacturing investments the primary targets for high-growth lead generation.

Residential Sector (Projected Growth: +7%)

After a significant downturn in 2022 and 2023, the residential sector is set for a robust recovery.⁸ Activity is expected to climb from 35.5 million hours in 2024 to

38.0 million hours in 2025, a 7% increase.³ This rebound is underpinned by a combination of factors: pent-up demand for housing, significant population growth driven by both permanent and temporary immigration, and the stimulating effect of lower mortgage rates.¹ Municipalities with strong demographic growth, available land, and pro-development housing policies will be at the forefront of this recovery.

Civil Engineering & Roads (Projected Change: -1%)

This sector is projected to experience a slight, 1% pullback to **40.5 million hours** in 2025.³ However, this minor dip follows a record-breaking year in 2024 and should be viewed as a temporary stabilization rather than a downturn.² The long-term outlook for this sector is exceptionally strong. The massive investments outlined in Hydro-Québec's Action Plan 2035, combined with ongoing major infrastructure projects such as the refurbishment of the Louis-Hippolyte-La Fontaine tunnel and the extension of the Réseau express métropolitain (REM), guarantee a sustained pipeline of high-value civil engineering contracts for the remainder of the decade.⁸

Institutional & Commercial (Projected Decline: -2%)

The institutional and commercial sector, which accounts for the largest share of hours worked in the industry at 56%, is facing a contraction.⁸ Activity is forecast to decline by 2%, from 119.0 million hours in 2024 to

116.5 million hours in 2025.³ This slowdown is primarily attributed to budgetary constraints and a reduction in new public investments, particularly in government and institutional buildings.¹

While the overall sector is shrinking, opportunities will persist in the renovation and upgrading of existing public infrastructure, such as schools and hospitals, as well as in privately funded commercial projects.¹ However, successful lead generation in this segment will require a more targeted and nuanced approach, focusing on specific funded projects rather than a broad market strategy.

This analysis of sectoral performance reveals a crucial dynamic for 2025. While headlines may focus on a "record year" for construction, the underlying reality is a powerful rotation of capital. Investment is shifting away from the traditionally dominant institutional and commercial sector and flowing decisively into high-tech industrial facilities and a recovering residential market. Provincial non-residential capital expenditure forecasts from Statistics Canada, which show a slight decline of 0.3% for 2025, appear to be skewed by the large-scale contraction in public institutional projects.¹⁹ This masks the potent growth occurring elsewhere. Therefore, construction firms and suppliers that have historically relied on public institutional contracts must strategically pivot their business development efforts toward the industrial and multi-family residential sectors to align with this new economic reality.

Prioritized Municipal Analysis: Identifying Quebec's Construction Hotspots

This section provides a detailed examination of Quebec's most promising municipal markets for construction-related lead generation in 2025. The analysis integrates financial data, permit values, demographic trends, and urban planning initiatives to create a comprehensive profile for each prioritized city. The municipalities are categorized into three tiers based on their growth profile and market size to guide strategic resource allocation.

Table 1: Prioritized Municipality Scorecard for 2025

Municipality	Administrative Region	2025 Budget (\$)	Programme Triennial d'Immobilisations (PTI) Value (\$)	2024 Construction Permit Value (\$)	Population (2021)	Pop. Growth % (2016-2021)	Key Growth Sector(s)
Trois-Rivières	Mauricie	384.4 M ²¹	2023-2025: Focus on infrastructure maintenance ²²	304.1 M ²³	139,163 ²⁴	3.5% ²⁵	Industrial, Residential
Shawinigan	Mauricie	133.8 M ²⁶	2025-2027: 144.1 M (48.3 M in 2025) ²⁷	N/A	49,620 ²⁸	0.5% ²⁸	Industrial, Infrastructure
Sherbrooke	Estrie	476 M ²⁹	2024-2028: 517 M (104 M in 2024) ³⁰	N/A	172,950 ³¹	7.2% ³¹	Residential, Infrastructure
Montreal	Montréal	7.28 B ³²	2025-2027: Extensive (SHDM alone >91.5 M) ³³	>512 M (Oct 2023) ³⁴	1,762,949 ³⁵	3.4% ³⁵	Civil Eng., Residential

Longueuil	Montréal	565.4 M ³⁶	2025-2027: 266 M ³⁶	N/A	254,483 ³⁷	6.1% ³⁷	Residential, Civil Eng.
Laval	Laval	1.23 B ³⁸	2025-2027: Available ³⁹	N/A	438,366 ⁴⁰	3.6% ⁴⁰	Residential, Civil Eng.
Terrebonne	Lanaudière	4.94% increase over 2024 ⁴¹	2025-2027: 430 M ⁴²	N/A	119,944 ⁴³	7.5% ⁴³	Residential, Infrastructure
Repentigny	Lanaudière	190 M ⁴⁴	2024-2028: 295 M (51.7 M in 2025) ⁴⁵	N/A	86,100 ⁴⁷	2.2% ⁴⁷	Residential, Infrastructure
Gatineau	Outaouais	887 M ¹²⁰	2025-2029: Extensive, includes \$432M for water & \$210M for roads ¹²¹	N/A	291,041 ¹²³	5.4% ¹²³	Infrastructure, Residential

Tier 1: Premier Growth Markets (High Growth & High Investment)

These municipalities represent the most dynamic opportunities, characterized by a

convergence of high percentage growth, significant new investment, and strong demographic trends.

3.1.1. Trois-Rivières (Mauricie)

Investment & Spending Analysis:

Trois-Rivières has established itself as a focal point of construction activity in Quebec. The city council adopted a balanced 2025 municipal budget of \$384.4 million, providing substantial operational capacity.²¹ More indicative of future construction, the city's capital planning, outlined in its 2023-2025 Programme Triennal d'Immobilisations (PTI), prioritizes the maintenance and modernization of existing infrastructure. This strategy, which allocates 90% of capital funds to maintenance and 10% to new development, ensures a steady stream of renewal projects. In 2023, this included major investments of \$29.3 million for potable water management, \$21.2 million for wastewater, and \$21.6 million for public roadwork.²² This foundational spending is being amplified by a private-sector boom; in 2024, the city issued a record-breaking

\$304.1 million in construction permits, a sharp increase from \$230.9 million in 2023. This activity is set to create 1,539 new housing units, a direct response to growing demand.²³

Dominant Sector Analysis:

The city is a primary beneficiary of the Industrial sector boom sweeping the Mauricie region, which is attracting investment related to energy transition and advanced manufacturing. This industrial growth is creating a powerful secondary effect, fueling a surge in the Residential sector to house the incoming workforce. The record permit values for new housing are a clear indicator that residential development is accelerating to keep pace with industrial expansion.²³

Demographic & Urban Context:

Trois-Rivières is the 9th largest city in Quebec, with a 2021 population of 139,163.²⁴ It experienced a healthy growth rate of 3.5% between 2016 and 2021, outpacing the regional average.²⁴ The city is actively planning for future growth through large-scale urban development projects. The

District 55 development, strategically located at the intersection of Highways 40 and 55, is a prime example. This project is creating a new, mixed-use living environment with a variety of residential and commercial offerings, integrated green spaces, and active transportation networks, signaling a long-term municipal commitment to densification and modern urban design.⁴⁸

Public Data Sources:

- **Budget:** <https://www.v3r.net/a-propos-de-la-ville/budget-et-rapports-financiers> ⁴⁹
- **Urban Plan (Plan d'urbanisme):**

<https://www.v3r.net/a-propos-de-la-ville/planification/plan-durbanisme> ⁴⁹

- **PTI:** Information is available via the budget link and detailed in municipal communications.²²
- **Permits:** Data is primarily released through official reports and communications, as no centralized open data portal for permits was identified.²³
- **Agendas and Minutes (Ordres du jour et procès-verbaux):**
<https://www.v3r.net/a-propos-de-la-ville/vie-democratique/ordres-du-jour-et-proces-verbaux> ⁵¹

3.1.2. Shawinigan (Mauricie)

Investment & Spending Analysis:

Shawinigan's municipal finances reflect a clear strategy of investment in growth-enabling infrastructure. The 2025 municipal budget is set at \$133.8 million, a 2.3% increase over the previous year.²⁶ This is complemented by an ambitious 2025-2027 PTI totaling **\$144.1 million**. For 2025 alone, the PTI allocates **\$48.3 million** toward key projects, including \$11.3 million for parks and sports facilities and another \$11.1 million for the critical rehabilitation of road and underground infrastructure.²⁷

Dominant Sector Analysis:

As a key city within the Mauricie region, Shawinigan is capitalizing on the province-wide Industrial expansion. It is a central player in the "Vallée de la Transition Énergétique" (Energy Transition Valley) and has cultivated a reputation as Quebec's third-largest digital hub, attracting new businesses and talent.⁵² This industrial focus is supported by the significant public infrastructure spending detailed in its PTI, creating a dual stream of construction opportunities.

Demographic & Urban Context:

The city's population was 49,620 in 2021, showing modest but stable growth of 0.5% since 2016.²⁸ However, more recent data suggests an acceleration in demographic trends; a 2023 report from the local newcomer support service noted a record influx of 533 new arrivals, a 63% increase over the previous year, signaling growing attractiveness.⁵⁴ In response, the city is proactively managing its future development by undertaking a comprehensive revision of its urban plan and associated regulations during 2024 and 2025.⁵⁵

Public Data Sources:

<https://canadacommons.ca/artifacts/19286746/shawinigan-municipal-budget-2025/20187287/> ²⁶
- **Urban Plan:** shawinigan.ca/urbanisme ⁵⁵
- **PTI:** Detailed in municipal press releases and news reports.²⁷

- **Permits:** <https://www.shawinigan.ca/services-aux-citoyens/permis-et-inspection/> ⁵⁶
- **Agendas and Minutes (Ordres du jour et procès-verbaux):**
<https://www.shawinigan.ca/ville/conseil-municipal/seances-du-conseil/> ⁵⁸

3.1.3. Sherbrooke (Estrie)

Investment & Spending Analysis:

Sherbrooke is backing its rapid growth with substantial financial commitments. The city's 2025 operating budget is \$476 million, a notable \$55 million increase from 2024, reflecting expanded service needs and investment capacity.²⁹ The city's capital investment plan is particularly robust; the 2024-2028 capital program (its PTI equivalent) totals **\$517 million** over five years. For 2024 alone, \$104 million was allocated, with a strong focus on maintaining and upgrading core assets, including \$121 million for underground and road infrastructure renewal, \$64.6 million for building repairs, and \$56 million for electrical infrastructure over the five-year period.³⁰

Dominant Sector Analysis:

Sherbrooke is experiencing overwhelming demand in its Residential sector, particularly for rental units and single-family homes, making it a key market for housing developers and suppliers.¹³ This residential boom is supported by the city's massive public investment in **Civil Engineering** and infrastructure renewal, as detailed in its capital program.

Demographic & Urban Context:

Sherbrooke's most compelling characteristic is its demographic dynamism. The population reached 172,950 in 2021, having grown by an exceptional 7.2% since 2016—one of the highest rates among Quebec's major cities and well above the provincial average.³¹ Projections indicate this trend will continue, with the Estrie region expected to see a 24% population increase by 2051.⁶⁰ To manage this growth, the city has established a "Gateway for developers" to streamline project approvals and is modernizing its planning framework by adopting its first independent Urban Plan since the 2002 municipal fusion.⁶¹

Public Data Sources:

- **Budget:**
<https://www.sherbrooke.ca/fr/vie-municipale/actualites/communiqués-de-presse/1105/budget-de-fonctionnement-2025> ²⁹
- **Urban Plan:** A preliminary version of the 2040 Urban Plan is available, with the final version expected in 2026.⁶²
- **PTI:**
<https://www.sherbrooke.ca/fr/vie-municipale/actualites/communiqués-de-presse/1022/programme-d-immobilisations-2024-2028> ³⁰

- **Permits:** <https://www.sherbrooke.ca/en/population-services/permits-and-certificates> ⁶³
- **Agendas and Minutes (Ordres du jour et procès-verbaux):**
<https://www.sherbrooke.ca/fr/vie-municipale/seances-du-conseil/1/seance-ordinaire> ⁶⁵

Tier 2: Major Market Opportunities (Sustained High Volume)

These are Quebec's largest urban centers. While their percentage growth may be more moderate, the sheer volume of investment and construction activity makes them essential markets.

3.2.1. Montreal

Investment & Spending Analysis:

As Quebec's economic hub, Montreal's construction market operates on a scale unmatched in the province. The city's 2025 operating budget is \$7.28 billion.³² Capital spending is correspondingly massive. The 2025-2027 PTI for the Société d'habitation et de développement de Montréal (SHDM), the city's housing and development corporation, alone allocates over

\$91.5 million for maintaining and upgrading its residential and commercial building portfolio, illustrating the depth of public and para-public investment.³³ Permit values are consistently high; the city's open data portal shows over 19,000 permits issued in 2024, and monthly values frequently exceed \$500 million.³⁴

Dominant Sector Analysis:

Despite a forecast indicating a slight cooling in the broader Grand Montréal region due to the institutional sector slowdown, the city remains a powerhouse for Civil Engineering and Residential construction.³ Major civil projects, such as the REM expansion and the comprehensive revitalization of Sainte-Catherine Ouest, represent billions in investment.⁶⁷ Simultaneously, the pressing need for housing drives continuous activity in high-density residential construction, including social and community housing projects.⁶⁷

Demographic & Urban Context:

The city of Montreal's population was 1,762,949 in 2021, with a growth rate of 3.4% since 2016.³⁵ The Census Metropolitan Area (CMA) is home to over 4.3 million people, making it the second-largest in Canada.⁶⁹ The city's development is guided by its ambitious new **Plan d'urbanisme et de mobilité (PUM) 2050**. This transformative strategic document outlines a long-term vision for creating complete, dense neighborhoods, supported by a vast

expansion of sustainable transportation, including new tramway networks.⁶⁸

Public Data Sources:

- **Open Data Portal (Permits):** <https://opendatamontreal.ca/data/building-permits> ⁶⁶
- **Budget:** Official documents are available at montreal.ca; key figures are reported in media.³²
- **Urban Plan (PUM 2050):**
<https://montreal.ca/articles/plan-durbanisme-et-de-mobilite-2050-72130> ⁶⁸
- **PTI:**(<https://ville.montreal.qc.ca/pls/portal/url/ITEM/274AD374BC69E0FAE0630A930132E0FA>) ³³

&((https://ville.montreal.qc.ca/portal/page?_pageid=5798,85931607&_dad=portal&_schema=PORTAL)) (Executive Committee) ⁷²

3.2.2. Longueuil

Investment & Spending Analysis:

As Montreal's second-largest suburb, Longueuil is a major construction market in its own right. The city's 2025 budget is \$565.4 million.³⁶ Its capital investment plans are substantial, with a 2025-2027 PTI of

\$266 million earmarked for 105 projects. A significant portion, \$28.3 million, is dedicated to modernizing essential sewer and pipeline infrastructure.³⁶ Broader reports indicate a total investment plan of \$850 million by 2027, signaling a sustained commitment to development.⁷⁵

Dominant Sector Analysis:

Longueuil is fundamentally a commuter city, and its construction market is dominated by the Residential sector, which is expanding to accommodate a growing population.⁷⁶ This growth necessitates corresponding investments in

Civil Engineering to upgrade and expand municipal services and transportation networks.

Demographic & Urban Context:

The city is experiencing strong demographic growth, with its population reaching 254,483 in 2021, a 6.1% increase from 2016.³⁷ Projections from the regional health authority forecast a further 17% increase by 2041, ensuring long-term demand for housing and services.⁷⁸ The city's 2021 Urban Plan provides the framework for this growth, emphasizing densification and the strategic development of key areas such as the downtown core, the Pôle Roland-Therrien, and districts surrounding transit stations.⁷⁹

Public Data Sources:

- **Budget:** Key figures reported in media ³⁶; official documents available at longueuil.quebec.
- **Urban Plan:** <https://longueuil.quebec/fr/services/plan-urbanisme> ⁸⁰
- **PTI:** Detailed in news reports. ³⁶
- **Permits:** An online permit portal is available at <https://permisenligne.longueuil.quebec/>. ⁸¹
Datasets are also accessible via the Open Canada portal. ⁸²
- **Agendas and Minutes (Ordres du jour et procès-verbaux):**
<https://longueuil.quebec/fr/conseil-de-ville> ⁸³

3.2.3. Laval

Investment & Spending Analysis:

Laval's 2025 budget of \$1.23 billion reflects its status as a major urban center, with a commitment to limiting the general tax rate increase to 1.9% through efficient financial management.³⁸ The city's 2025-2027 Programme Triennal d'Immobilisations (PTI) outlines planned investments to develop and improve municipal infrastructure, with a focus on water management and enhancing resilience to climate change.³⁹

Dominant Sector Analysis:

The Residential sector in Laval is exceptionally active, at times even surpassing Montreal in monthly housing starts. In November 2024, 543 new housing units were started, 90% of which were rental units, highlighting the intense demand in the rental market.⁸⁵ This residential boom is supported by significant

Civil Engineering projects, such as the construction of new rainwater reservoirs and other green infrastructure to manage stormwater runoff.⁸⁶

Demographic & Urban Context:

With a population of 438,366 in 2021, Laval is Quebec's third-largest city and has experienced steady growth of 3.6% since 2016.⁴⁰ Recent data indicates that this population growth has accelerated significantly, placing Laval among the fastest-growing regions in the province.⁸⁷ The city's development is guided by its "Code de l'urbanisme" (CDU), a modern planning framework that emphasizes quality densification, the protection of natural environments, and the promotion of sustainable mobility.⁸⁸

Public Data Sources:

- **Budget and PTI:**
<https://www.laval.ca/en/municipal-organization/budget-financial-reports/budget/> ³⁹

<https://www.laval.ca/vie-democratique/hotel-de-ville-personnes-elues/ordre-jour-proces-verbaux-sommaire/>⁹⁰

3.2.4. Terrebonne

Investment & Spending Analysis:

Terrebonne's 2025 budget increased by 4.94%, or \$15.5 million, reflecting the city's growth.⁴¹ The 2025-2027 Programme Triennal d'Immobilisations (PTI) outlines investments of approximately

\$430 million, a deliberate \$60 million reduction from the previous plan to ensure responsible management of public funds and respect for taxpayers' capacity to pay.⁴² Investments are balanced between maintaining existing assets and funding new development projects.⁹²

Dominant Sector Analysis:

Driven by strong demographic growth, the Residential and Infrastructure sectors are dominant in Terrebonne. The PTI prioritizes the construction, repair, and renewal of municipal facilities and infrastructure across all sectors of the city.⁹¹ Key projects include the Urbanova interchange, the redevelopment of heritage sites, and a \$13 million investment in new cycling lanes by 2027.⁴²

Demographic & Urban Context:

Terrebonne is one of the fastest-growing municipalities in the region, with its population reaching 119,944 in 2021, a significant 7.5% increase since 2016.⁴³ The city's development is guided by its "Manuel d'urbanisme durable" (MUD), an innovative and integrated planning framework that provides a flexible yet coherent approach to managing sustainable development over the long term.⁹⁴

Public Data Sources:

- **Budget:**(<https://terrebonne.ca/wp-content/uploads/2024/12/Budget-2025-Ville-de-Terrebonne.pdf>)⁴¹

- **Agendas and Minutes (Ordres du jour et procès-verbaux):**
<https://terrebonne.ca/seances-du-conseil-municipal/>⁹⁷

3.2.5. Repentigny

Investment & Spending Analysis:

The City of Repentigny adopted a 2025 budget of \$190 million.⁴⁴ The city has implemented a five-year capital works program (PQI) for 2024-2028, which goes beyond the legal three-year requirement to provide a longer-term vision. This PQI totals

\$295 million, with **\$51.7 million** allocated for 2025.⁴⁵ The primary focus of these investments is the repair and maintenance of existing assets, including roads, water systems, and parks, to ensure their performance and longevity.⁴⁶

Dominant Sector Analysis:

The key sectors are Residential and Infrastructure. The city is actively managing its urban development, with a complete overhaul of its urban plan underway.⁹⁸ A key focus is controlling densification to ensure it respects the territory's character, as evidenced by a development slowdown imposed on the rue Notre-Dame corridor pending the new plan's completion.⁹⁸

Demographic & Urban Context:

Repentigny's population was 86,100 in 2021, representing a 2.2% increase from 2016.¹⁰⁰ The city's ongoing revision of its Urban Plan and associated regulations is a proactive measure to ensure that future development aligns with the community's needs and the territory's capacity.⁹⁹

Public Data Sources:

- **Budget:**

- **Agendas and Minutes (Ordres du jour et procès-verbaux):**
<https://repentigny.ca/la-ville/vie-democratique/conseil-municipal>¹⁰⁴

3.2.6. Gatineau

Investment & Spending Analysis:

Gatineau's 2025 budget of \$887 million represents a significant 10.4% increase from the previous year, signaling a strong commitment to growth and service enhancement.¹²⁰ This budget is supported by a 3.18% increase in residential property taxes and a 4.18% rise for commercial properties.¹²¹ The city's capital investment plan is extensive, with a five-year plan that includes

\$432 million for water infrastructure and a **\$210 million initiative for road paving.**¹²¹ Key allocations for 2025 include \$138.6 million for Public Works, \$117.7 million for infrastructure development, \$7 million for affordable housing, and \$5 million for homelessness services.¹²¹

Dominant Sector Analysis:

Civil Engineering and Infrastructure are the dominant sectors, driven by the massive five-year investment plans for water systems and roads.¹²¹ The

Residential sector is also a major focus, with the city allocating funds to create 1,137 new affordable housing units to address the ongoing housing crisis.¹²¹ Significant spending is also directed toward

Institutional and social infrastructure, including the new Lucy-Faris Library, upgrades to the Cégep de l'Outaouais auditorium, and enhanced funding for social services.¹²⁰

Demographic & Urban Context:

As Quebec's fourth-largest city, Gatineau had a population of 291,041 in 2021, with a robust growth rate of 5.4% between 2016 and 2021.¹²³ The city is actively managing its growth through a comprehensive revision of its urban plan and specific planning initiatives for historic areas like Old Aylmer.¹²⁷ Development is also guided by ambitious environmental goals, including a target for carbon neutrality by 2050, which will drive demand for green construction and sustainable infrastructure projects.¹²¹

A crucial element of a sophisticated lead generation strategy is the ability to distinguish between different types of market signals. Historical data, such as annual permit values, serve

as **lagging indicators**; they confirm that growth has already occurred and identify contractors who were active in the recent past.²³ Annual municipal budgets are

current indicators, revealing a city's spending capacity for the ongoing year.²¹ The most valuable strategic tools, however, are the

leading indicators: the Programme Triennal d'Immobilisations (PTI) and the Plan d'urbanisme. These documents outline a multi-year pipeline of planned infrastructure projects and future zoning changes, effectively providing a roadmap of where construction activity will be generated for years to come.²⁷ An effective strategy must leverage all three: use PTIs and Urban Plans for long-term strategic mapping, annual budgets to qualify near-term spending power, and permit data for immediate, tactical engagement with active contractors.

Strategic Recommendations for Lead Generation

Based on the preceding analysis of provincial trends and municipal hotspots, the following strategic recommendations are proposed to optimize lead generation efforts in Quebec's construction market for 2025 and beyond.

A Dual-Pronged Targeting Strategy

The divergent growth paths of Quebec's construction sectors and regions necessitate a two-pronged approach to market targeting.

- **High-Growth Pursuit (Mauricie & Estrie):** Marketing and sales resources should be concentrated on the premier growth markets of **Trois-Rivières, Shawinigan, and Sherbrooke**. In Mauricie, the focus should be on identifying and engaging with general contractors and specialized subcontractors involved in the construction of industrial facilities for the battery sector. This industrial boom is creating a secondary wave of demand for residential construction, which should also be targeted. In Sherbrooke, the primary driver is its exceptional 7.2% population growth, making it a prime market for suppliers of residential building materials and contractors specializing in multi-family housing.³¹
- **High-Volume Engagement (Greater Montreal Area & Gatineau):** In the major markets of **Montreal, Laval, Longueuil, and Gatineau**, the strategy should shift from pursuing percentage growth to engaging with high-volume projects. Efforts should be focused on building relationships with the large civil engineering firms and major real estate

developers responsible for public infrastructure (transportation, waterworks) and high-density residential towers. The key to long-term success in these markets lies in monitoring their PTI and PUM documents to anticipate the multi-year pipeline of major projects.¹²⁴

A Framework for Leveraging Municipal Public Data

The public data sources identified in this report are not merely reference points; they are actionable intelligence tools that can be integrated into a systematic lead generation process.

- **PTI Monitoring:** A process should be established to systematically download and analyze the PTI documents for all Tier 1 and Tier 2 municipalities. These documents are a direct pipeline of future public tenders and provide specific details on the scope, value, and timeline of planned infrastructure work. This allows for proactive engagement with municipal engineering departments and prime contractors well before tenders are publicly issued.
- **Urban Plan Analysis:** The *Plan d'urbanisme* for each target city should be reviewed to identify areas newly zoned for residential, commercial, or industrial development. This provides a strategic, long-term view of where growth will be concentrated, enabling the targeting of landowners and developers in those specific zones.
- **Permit Data Mining:** For municipalities with accessible permit data, such as Montreal, a system for regularly scraping and analyzing this information should be implemented. This data can be used to identify which contractors are currently active, the types and scale of projects they are undertaking, and potential partnership opportunities. This is a source of immediate, tactical leads.

Future Outlook: Anticipating the Next Wave

Looking beyond 2025, several macro trends will continue to shape the Quebec construction landscape.

- The provincial government's strong emphasis on green energy, exemplified by the Hydro-Québec Action Plan 2035, and sustainable development, as embedded in the urban plans of Montreal and Laval, signals a long-term market shift. Companies that supply green building materials, energy-efficient systems, or specialized engineering services for sustainable infrastructure will hold a significant competitive advantage.
- The pronounced demographic growth in secondary cities and large suburbs, such as

Sherbrooke (7.2% growth) and Longueuil (6.1% growth), is a trend that is likely to persist.³¹ These markets will continue to outperform in the residential sector as they attract residents seeking more space and affordability than is available in the core of Montreal.
