

ARCHITECTURAL DIAGRAM

SOFT REQUIREMENTS

- **Safety & Trust:** Reliability scoring engine gates access to games based on user history, report mechanism prevents abuse, attendance confirmation enforces accountability.
- **Privacy:** Data Privacy laws (PIPEDA) do not apply for non commercial projects. Voluntary compliance. Location privacy controls, profile visibility defaults protect player data, consent-based data collection.
- **Terms of Service:** Standard ToS with strict no warranty and no liability waivers.
- **Environmental Impact:** Relies entirely on commercial managed services.
- **Copyright:** The codebase is licensed under AGPL (strong copyleft, strict no warranty and no liability)

WHY PLAYLOCAL?

 Smart Matchmaking Fair team balancing based on skill levels, positions, and play styles. No more lopsided games.	 Location-Based Discovery Find games near you with weather updates, map directions, and distance filters.	 Real-Time Coordination Live rosters, waitlists, chat rooms, and check-ins to keep everyone in sync.
 Match Records & Stats Track every game with detailed stats, skill evolution, and performance insights.	 Shareable Highlights Create game recaps with photos, stats, and highlights to share with friends.	 Safety & Trust Verified organizers, credibility scores, and reporting tools ensure safe play.

Indoor

LESSONS LEARNT

Alpha testing shaped priorities more effectively than assumptions. Early investment in CI/CD, SonarCloud, and clear Definition of Done enabled parallel development, reduced conflicts, and kept the team aligned throughout the project.

Managing a full-stack pivot from scratch taught us the value of strong architectural foundations. Proactive refactoring and incremental improvements, maintained velocity while building a sustainable platform ready for future growth.

PERSONAL DASHBOARD

MH

Minh Huynh

@minh-huynh

Basketball enthusiast and pickup game organizer. Always looking for competitive games in the Montreal area.
